GENERAL INFORMATION & SAFETY

Thank you for choosing the ***SHEYENNE BALE SPEAR***. It is a very useful attachment to your skid steer loader.

The ***SHEYENNE BALE SPEAR*** is made of high quality steel. It's designed to lift and carry round or square bales up to 2500 pounds. Loading and unloading is as simple as driving in and backing out. The three tine configuration keeps the bale stable in transport. Tines are replaceable.

Safe use of the bale spear is largely the responsibility of the skid steer operator. This is true whether loaded or not. Care needs to be exercised to avoid personal injury, injury to livestock or property damage. Keep all persons, particularly children, out of the work area!!! Loaded bales should be transported low to the ground. When lifting the bale it should be kept as level as possible, to avoid 'over-centering'. All powered movements should be as smooth as possible. Again, practice safety at all times!
